Nasal spray solution

# Parlatos

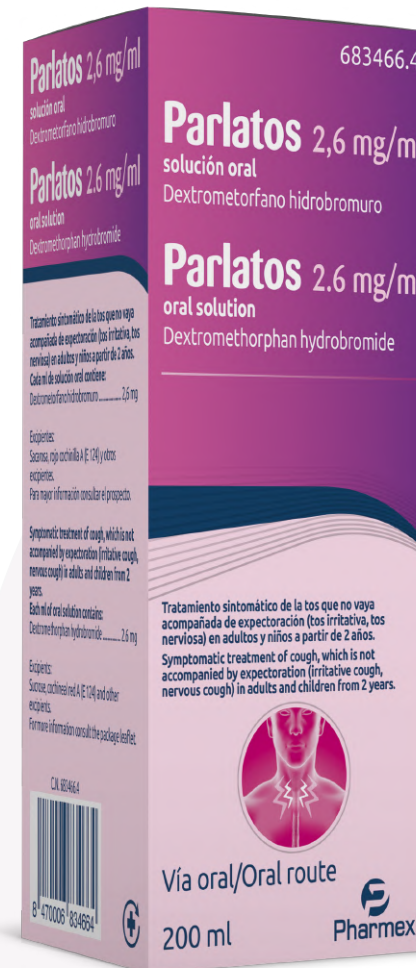

Dextromethorphan hydrobromide

Parlatos is indicated for the symptomatic treatment of cough not accompanied by expectoration (irritative cough, nervous cough) in adults and children from 2 years of age.

## DEXTROMETHORPHAN HYDROBROMIDE

An **antitussive** that **inhibits the cough reflex**.

**Pharmaceutical form:**  
200 ml solution

# VASELINE PURE OINTMENT CUVE<sup>®</sup>

Vaseline Pure Ointment

On the skin

Relief of symptoms of dryness, mild irritation and skin excoriations.

In use by qualified health professionals

in examinations as a lubricant in rectal examinations or application of dressings.

- Moisturises and softens the skin.
- With emollient properties
- Protects and cares.
- Reduces dryness.
- Reduces the feeling of tightness.
- Offers a soothing effect.
- Eradicates dryness and irritation.

# CUVEFILM

Chlorhexidine Digluconate Cutaneous Solution

Indicated as an antiseptic for wounds and minor skin burns as an antiseptic for the belly button of newborns.

Wounds and superficial cuts

Minor skin burns

Minor puncture

Piercing and other skin perforations

Bellybowl of the newborn.

# Glycerin Suppositories CUVE

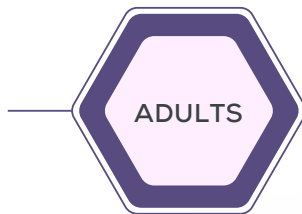

Local symptomatic relief of transient and occasional constipation (glycerol)

Its main active component is glycerol, which acts as a laxative.

Glycerol exerts its action locally at the colon level after the suppository application, therefore, it does not need to be absorbed to exert its action.

- The normal dose: 1 suppository per day, as needed, or as prescribed by a doctor.
- Transparent suppositories, colorless or slightly opaque, uniform texture, ovoid in shape.
- Packaged in a glass jar.
- It takes effect within 15–30 minutes of administration.
- Administered rectally.

For adults and adolescents aged 12 years and older. Each suppository contains 3g of glycerol.

For children aged 6 to 12 years. Each suppository contains 1.9g of glycerol.

# Hydrogen Peroxide CUVE

Hydrogen Peroxide Topical Solution and Concentrate for Oral Solution

It is an antiseptic indicated for:

**Superficial skin wounds** in adults, adolescents, and children aged 2 years and older.

**Mouthwash after dental extractions** in adults and adolescents.

Clean and odorless solution.

Each 100ml of solution contains 3g of hydrogen peroxide.

In the case of superficial skin wounds:  
Apply to the wound directly or with a cotton gauze.

In the case of rinses after dental extractions:  
Dilute with the same amount of water and rinse in the mouth for 1 minute.

# Lassar's Paste Imba

## Zinc Oxide

Contains zinc oxide and almond oil for daily care and protection of the diaper area.

ZINC  
OXIDE

Creates a protective barrier on baby's skin, preventing irritation and restoring softness and smoothness to the skin.

WHEAT  
STARCH

Absorbs moisture, creating a barrier that protects the skin and keeps it dry.

ALMOND  
OIL

Promotes skin hydration, thanks to its lanolin and sweet almond oil composition. It does not irritate the skin, protects it without drying or cracking it out.

Pharmaceutical form:  
Ointment

# Paradolmex

Paracetamol 1 g Oral Solution 10 Sachets

Paradolmex 1 g powder for oral solution is used to treat mild to moderate pain, musculoskeletal pain, osteoarthritis (degenerative joint condition), rheumatoid arthritis (joint inflammation causing pain and swelling), headache, dental pain, or dysmenorrhea. Feverish states.

Oral use.

**Fast and effective relief of mild to moderate:**

- Fever
- Pain in the head
- Muscles
- Lower back
